# SAFETY ALERT

Date: December 4, 2015

To: Users of the Airport/Facility Directory Southwest Volume

From: Aeronautical Information Services

Subject: Temporary Removal of Northern California Tower Enroute Control (TEC) Routes

---

---

The October 15, 2015 edition of the Southwest A/FD contained the first publication of TEC Routes for the Northern California area. Concern had been raised from the provider that the depiction used in the publication was in many cases not useful and occasionally incorrect. Due to the complicated nature and late timing of the notification, Aeronautical Information Services will not publish these routes in the December 10, 2015 edition. We expect to resolve those issues and publish these routes in the February 4, 2016 edition.
